Summary

A well policed fishery and as such an acceptable product. However, care should be made to ensure that it is fished in the well policed Alaskan waters.

PRR Accepted Standard

Caught by Nets (Drift and Set Gillnets, Purse Seine), Trolling and Fish wheels from US Territorial waters adjacent to the coast of the States of Alaska - FAO67-77 (Pacific North East/Pacific Centre East).

Sustainability

In Alaska, sockeye salmon populations are generally healthy, and fisheries only target healthy stocks. Scientists actively monitor these populations and fisheries, and managers adjust regulations for these fisheries every year and often in-season as well, according to changes in salmon abundance and other conservation considerations.
